SYERA ForestOps

Forestry operations in one workspace

Track fieldwork, review site risks and assess performance from site records through to management reports.

Sabah’s forestry landscape

Thematic illustration

System modules and functions

23 modules and views for managing forestry operations

Dashboards & reports

Dashboard
See operational, financial and asset indicators at a glance.

Report centre
Review monthly operations and financial reports.

Reporting dashboard
Filter clearing targets, verified work, budgets and vendor performance.

Action analytics
Prioritise overdue issues and gaps in clearing targets.

Forestry operations

Plantation blocks
Register block areas, species and management phases.

Field operations
Plan field work orders and monitor activity progress.

Nursery
Track seedling batches, transfers and remaining stock.

Harvesting
Record timber lots, harvested volumes and stock locations.

Dispatch
Track timber deliveries, customers and sales value.

Asset management

Asset register
Track asset custodians, book values and operating status.

Maintenance
Schedule servicing and track repairs, costs and status.

Maps & monitoring

Sabah / Pitas map
Explore plots and open reported encroachment zones from the map.

Plot register
Track plot area, verified clearing and undeveloped land.

Clearing work
Track work orders, targets, verified hectares and work value.

Clearing vendors
Review contractor records and work capacity.

Field issues
Log complaints and technical issues. Assign owners and due dates.

Photo audits
Record inspection findings and recommendations with photo evidence.

Finance

Invoices
Manage sales and purchase invoices and outstanding balances.

Receipts & payments
Record customer receipts and supplier payments against invoices.

Budget & expenditure
Compare budget allocations with actual spending.

Administration

Report register
Log operational, safety and environmental reports and follow-ups.

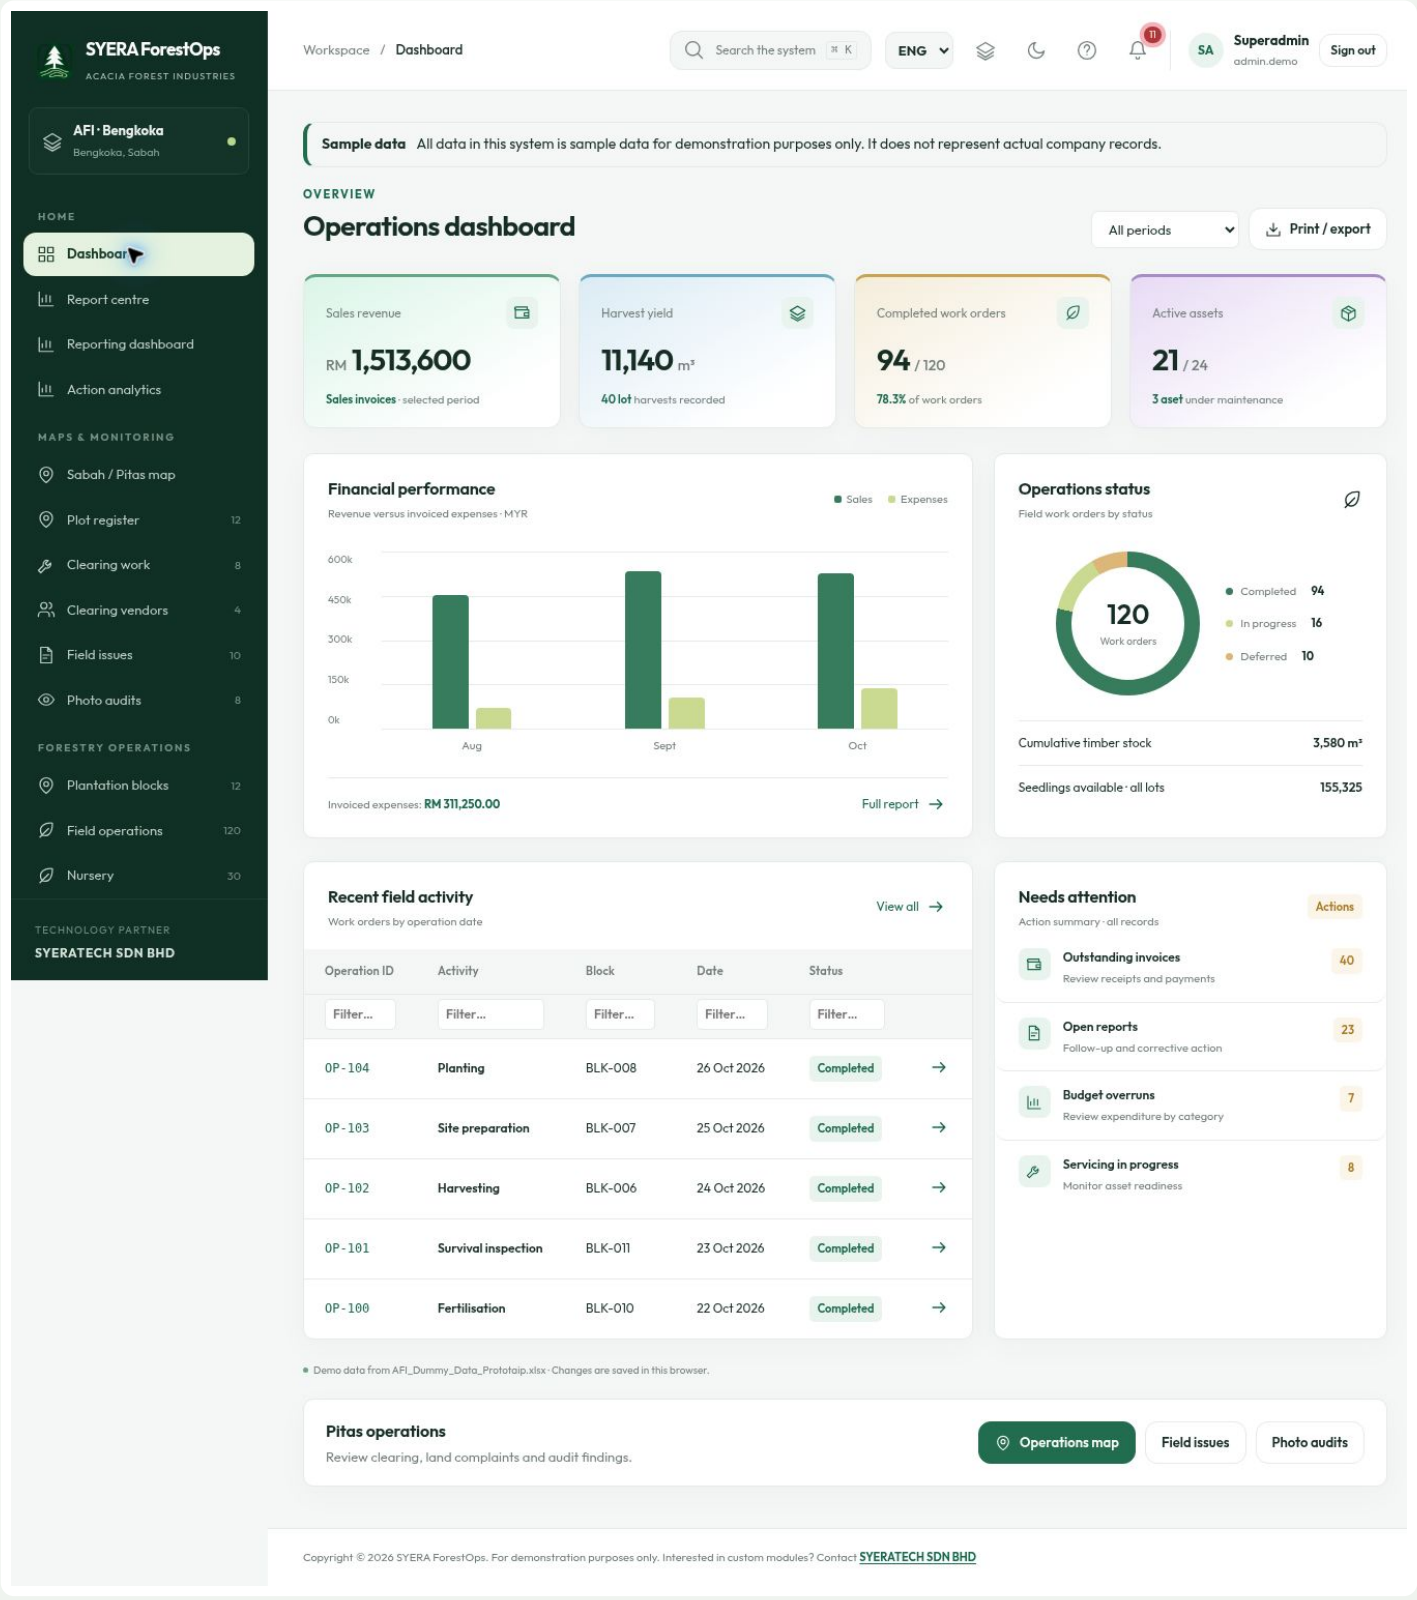

Business partners
Maintain customer and supplier records and payment terms.

Users
Review demo user profiles, departments and access roles.

DEMO SCREENS

Operations dashboard

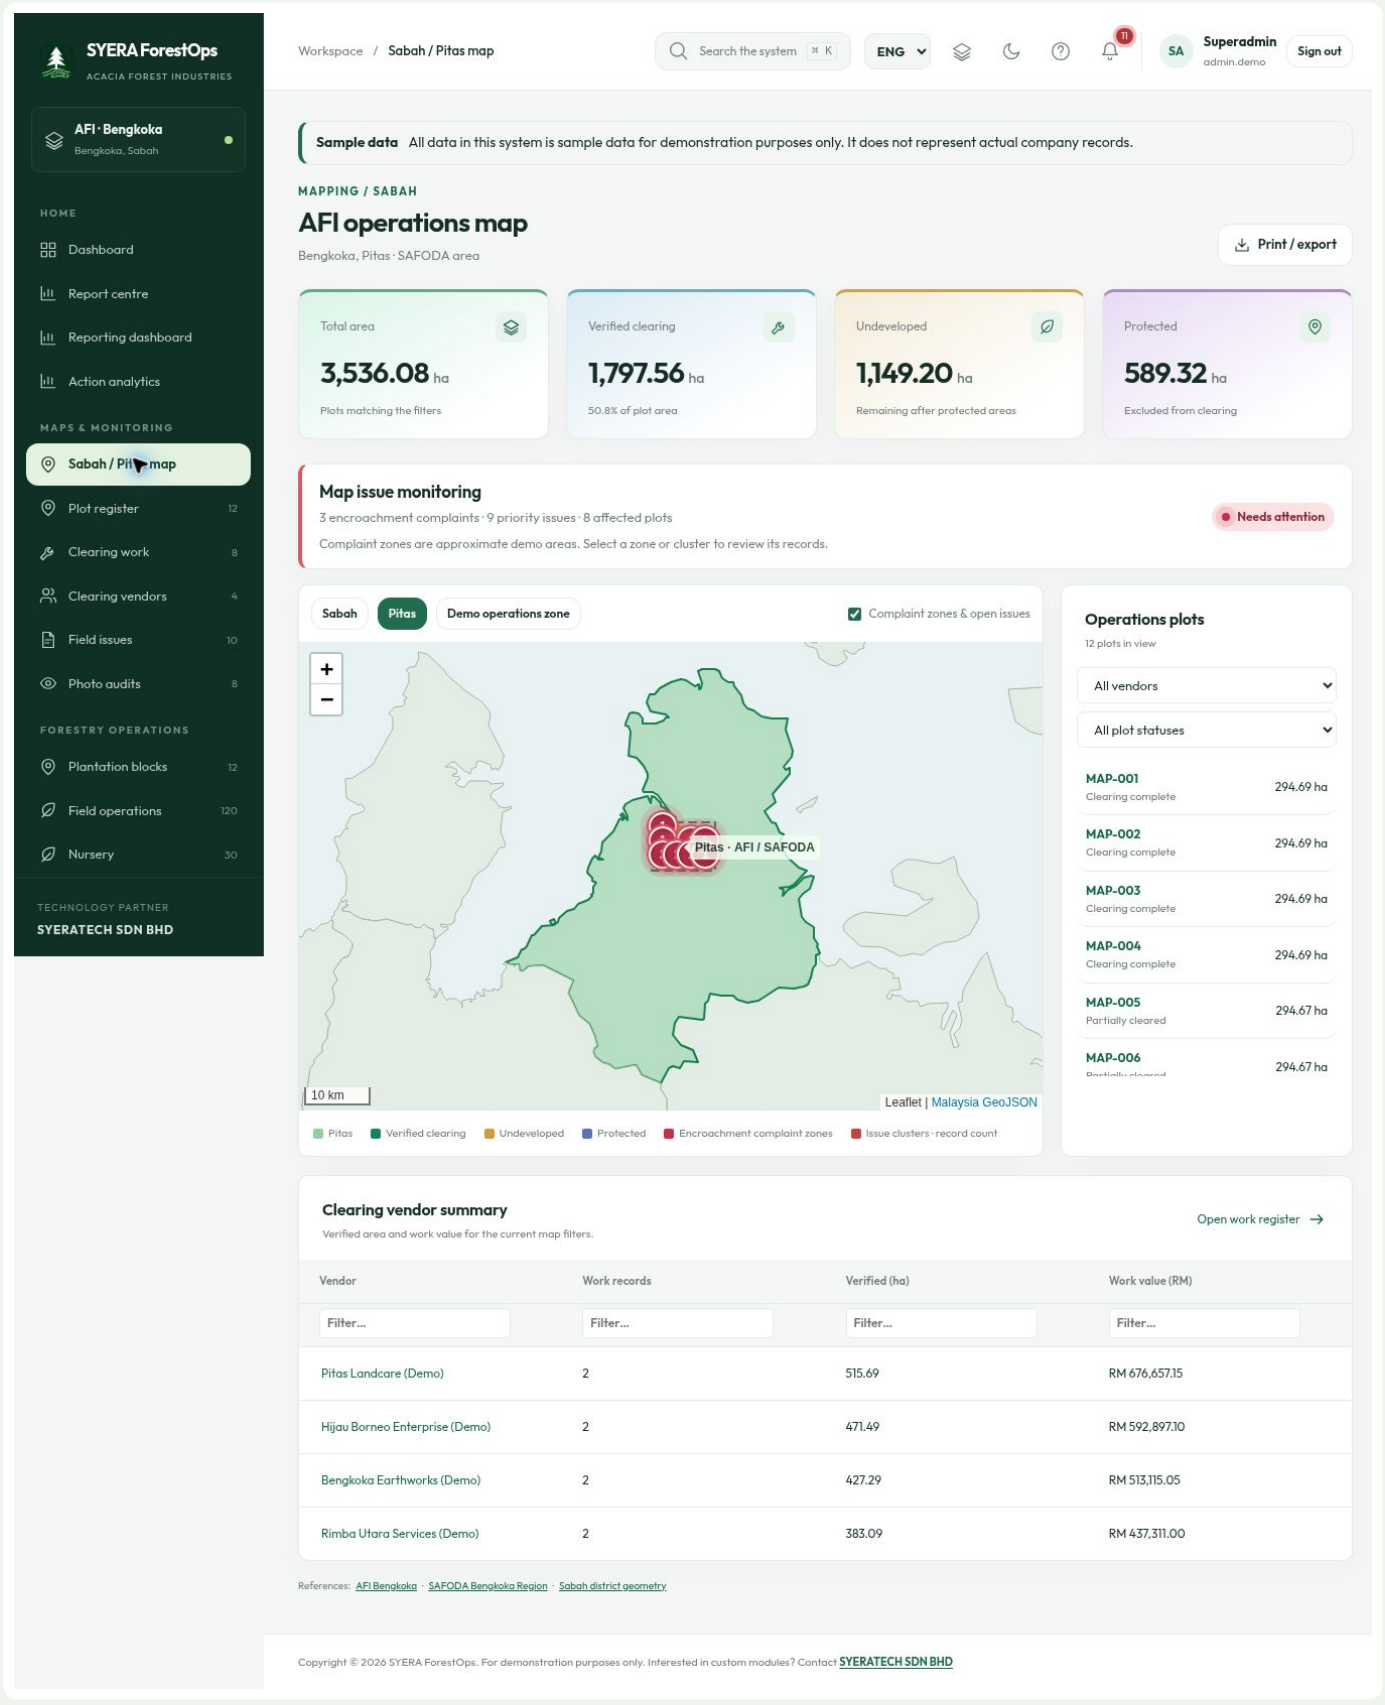

Monitor operational, financial and asset indicators in one view.

DEMO SCREENS

Sabah operations map

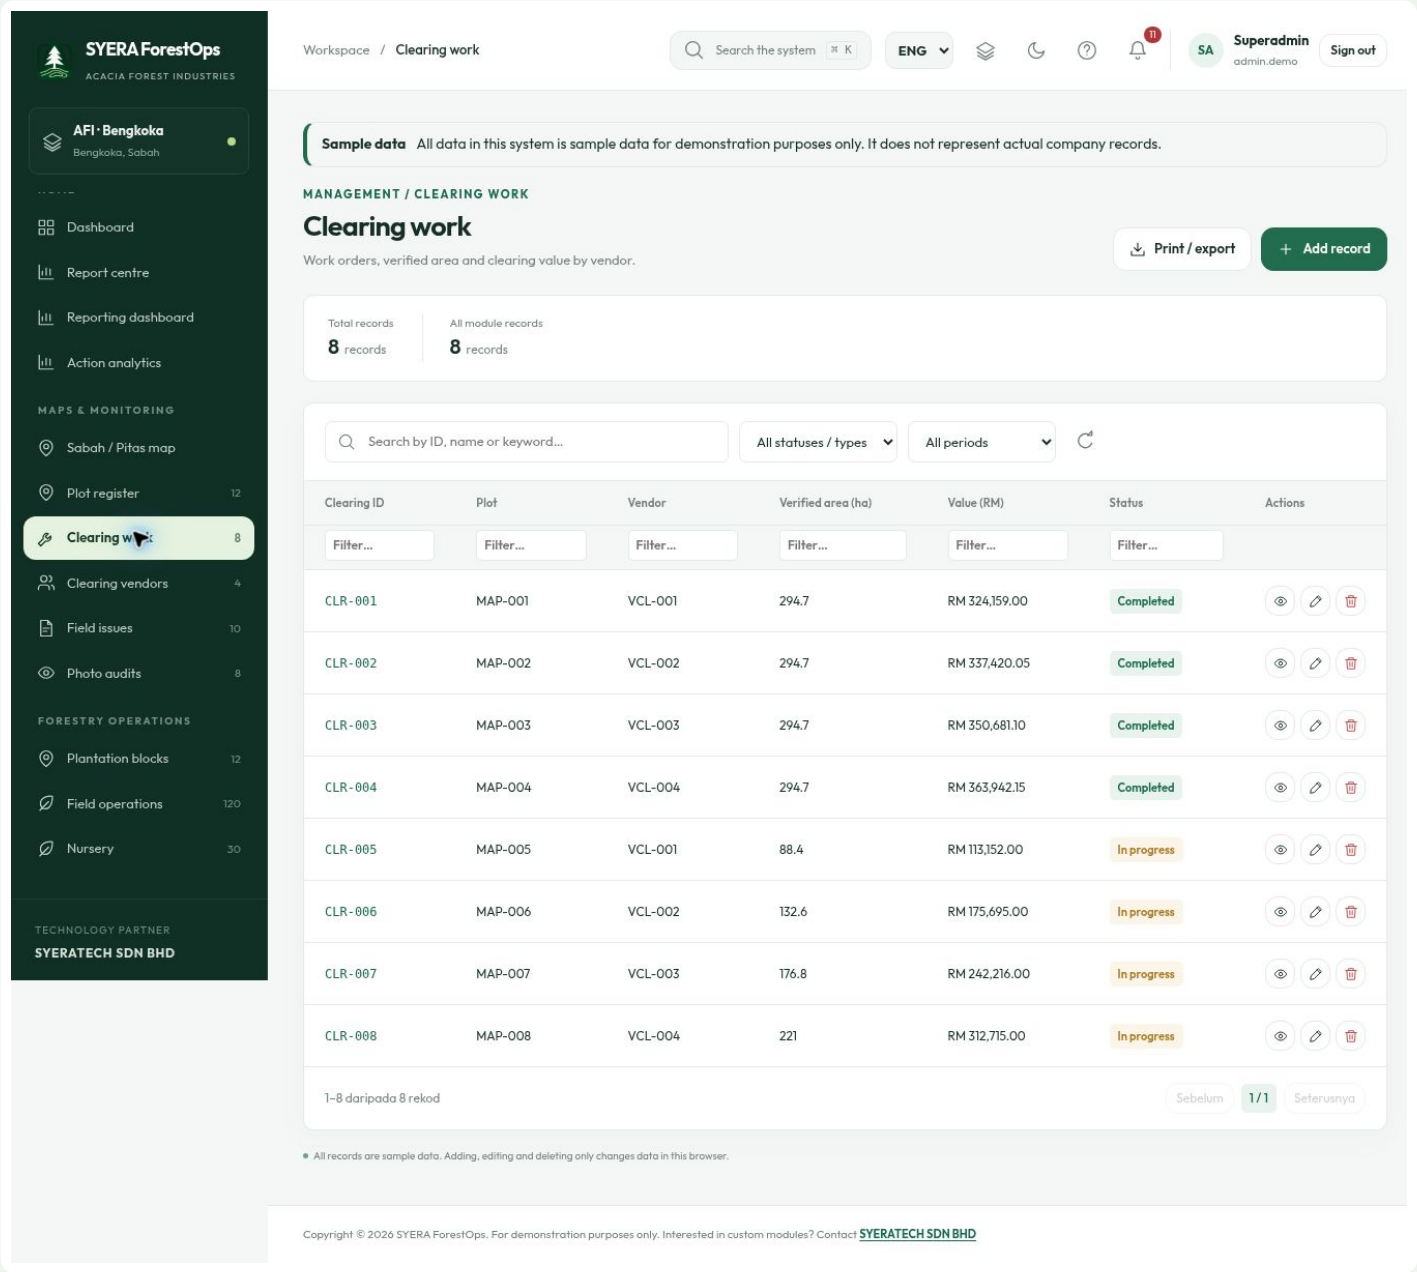

Explore work plots, clearing status and field issue zones on the map.

DEMO SCREENS

Clearing work register

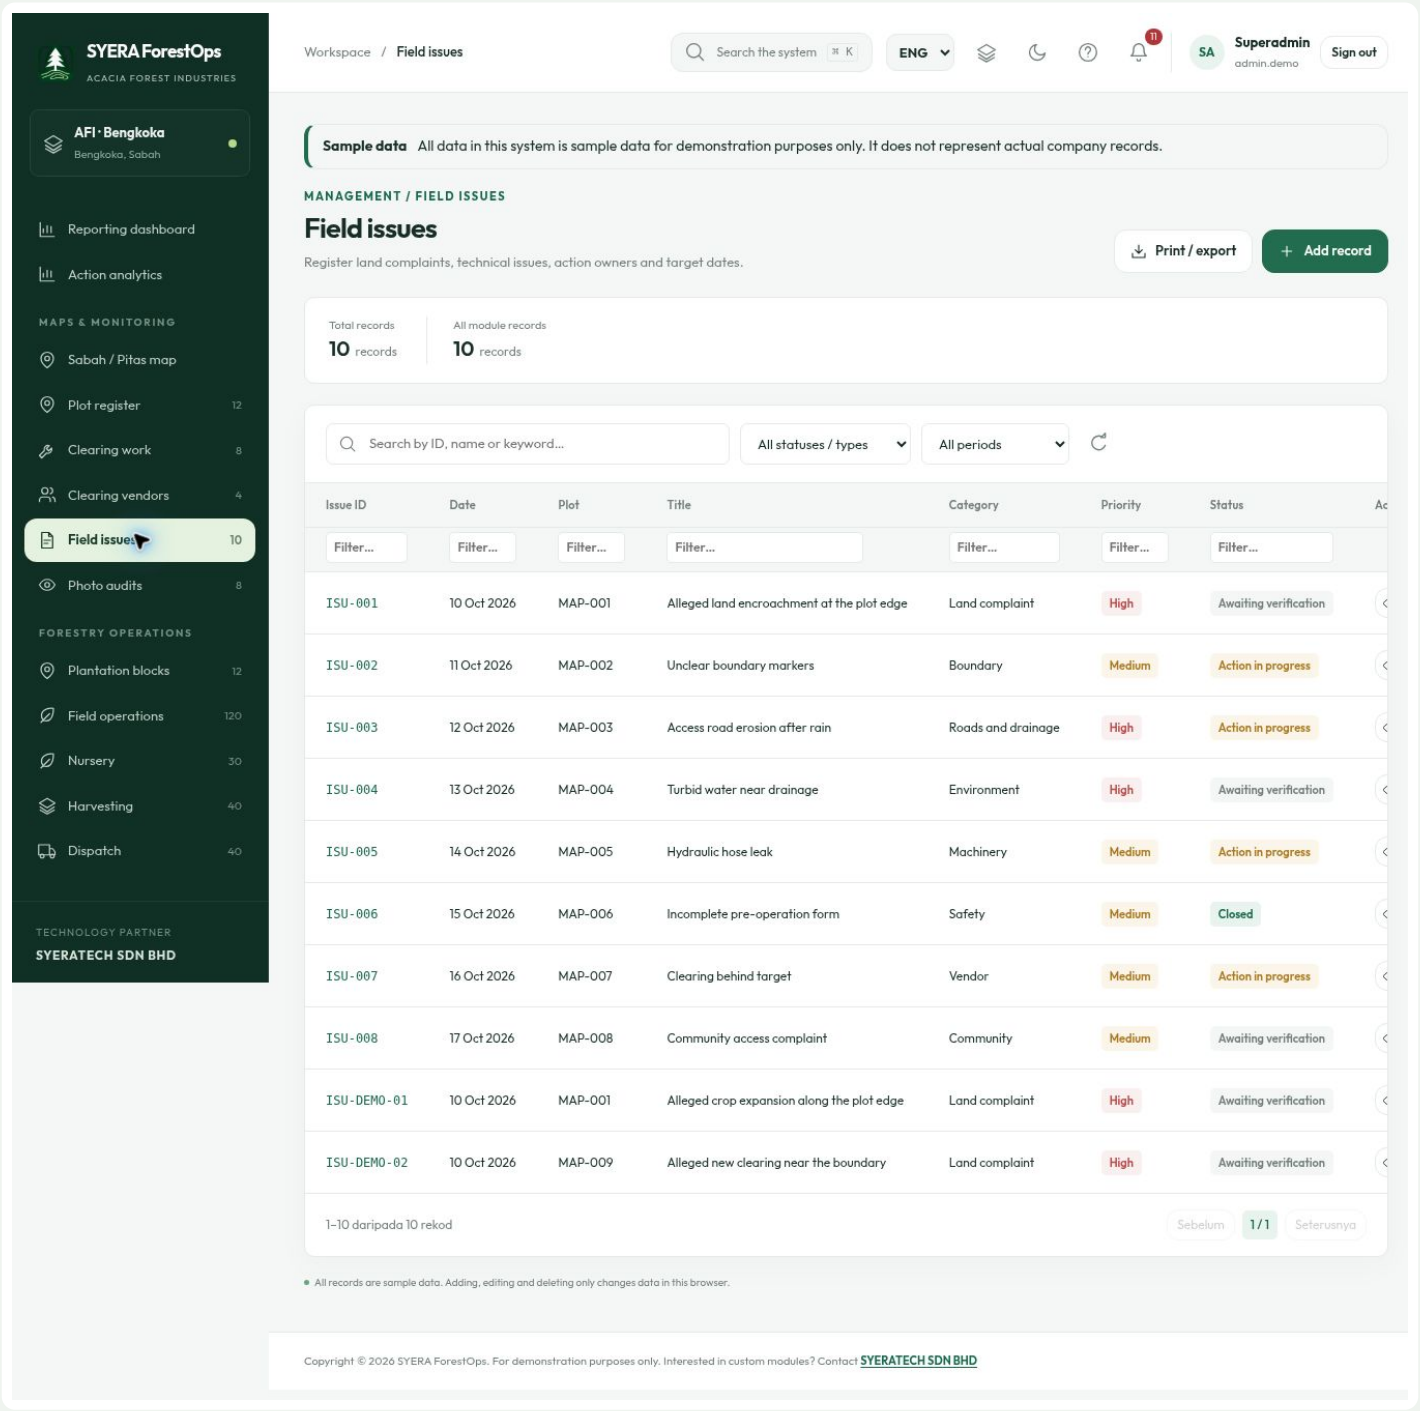

Review work records, vendors, verified area and status.

DEMO SCREENS

Field issues register

Review complaints, categories, priorities and follow-up status.

Explore the system demo

See how teams manage fieldwork, explore plot maps and review operations reports in one workspace.
